

ROYAL CHUCK STOPS

3 strong magnets secure stop to chuck face.

- ❑ The Royal Chuck Stop provides a simple, consistent method for **locating short parts** in a 3-jaw lathe chuck.
- ❑ Captive, web-shaped design eliminates the danger of using spacers or parallels that could come loose and be thrown from a spinning chuck. Three strong magnets further secure the stop to the chuck face.
- ❑ Stop allows short parts to project past the chuck jaws, providing **clearance for facing operations**.
- ❑ Setup time is greatly reduced – no need to bore soft jaws.
- ❑ The Royal Chuck Stop is very accurate – front

and back locating surfaces are parallel within +/- 0.0004".

- ❑ Accommodates chuck jaws up to 55mm (2 1/8") wide.
- ❑ Anodized finish provides good wear-resistance.
