

# ROYAL ROTA-RACK™ COMPACT

DESIGNED FOR SWISS APPLICATIONS

## AUTOMATED PARTS COLLECTION FOR SWISS APPLICATIONS

**NEW**

The **Royal Rota-Rack™ Compact** delivers hours of unmanned production, batches parts for easy inspection, and protects finished components from damage. **Specifically designed for small parts!**

- ✓ Accommodates machines with part exit heights ranging from 24 to 33 inches.
- ✓ Designed specifically for small parts/Swiss applications.
- ✓ Twelve removeable bins provide part separation/batching.
- ✓ Bins equipped with 4mm dia. drain holes for continuous return of oil/coolant to the machine sump.
- ✓ Provides high volume collection in a compact package:
  - 112 total cubic inches
  - 9.3 cubic inches per bin
- ✓ Simple programming via the integral PLC. Unit can also be easily wired into the machine tool control and indexed via M-code.
- ✓ Operates on 110V power.
- ✓ Removeable chute included (not shown).
